[Music] you [Music] I'm Jacob Hornberger president - the future of Freedom Foundation and this is episode six of my series on the JFK assassination one of the most interesting aspects of the autopsy that the US military conducted on the body of President John F Kennedy was the role that Lyndon Johnson played in all this you'll recall that when that team of Secret Service agents at Dallas Parkland Hospital brandished guns and threatened to kill anyone who got in their way and prevented them from taking the president's body out of parkland where they prevented the Dallas County Medical Examiner from conducting the autopsy as required by by law they said that they were operating under orders well there's only one person who reasonably could have issued that order in s Lyndon Johnson because because he was the guy sitting at Dallas Love Field having his people removed the seat from the back of Air Force One in anticipation that that team of Secret Service agents would be bringing the body soon to Air Force One now when Kennedy was shot his car proceeded directly to Parkland Hospital Johnson was in a different car in the motorcade his car also proceeds to Parkland Hospital and while at Parkland Hospital Johnson expresses the concern of the possibility that this assassination might be the first step in a Soviet surprise nuclear attack the United States as we'll see that's ridiculous it's not ridiculous in the possible sense that this could happen certainly it could have been a possibility the this was the height of the Cold War the Soviet Union and the United States had come within an inch of nuclear war during the Cuban Missile Crisis a few months before what's

Crisis a few months before what's ridiculous as we'll see is the notion that Johnson believed that that was a possibility now if Johnson really believed that that was a possibility would he have gone to Parkland Hospital or would he instead have directly gone straight to love field gotten on Air Force One or Air Force two gotten up in the air and directed America's to fences to this possible nuclear war fact that he goes to Parkland Hospital is very revealing now if so does Kennedy's declared dead Johnson gets in the car and starts to rush to Dallas Love Field on the way there he again starts playing this role he crunches down in the seat and says you know this could be the possibility of a Soviet attack they could ambush us never mind that they if they were gonna ambush him they would have had a military team at Parkland Hospital to do that but he rushes to get to Love Field with this possibility in mind and then what does he do at Love Field does he get up in the air immediately to direct America's defenses he'll all a gags around at Love Field waiting for that casket to appear in the meantime he telephoned to the Attorney General Bobby Kennedy to get an opinion as to whether he needs to be sworn in to be legally the president now here he is concerned about the possibility of a nuclear attack and he's thinking about whether he needs to be sworn in so Bobby Kennedy of course is no of course not you you're here automatically the president that wasn't good enough for Johnson now he later said that Kennedy told him something different but how likely is that but in any event Johnson summons a

federal judge to come and swear him in while this possibility supposedly exists that the Soviet Union's getting ready to launch nuclear missiles now there were two separate planes there at Dallas Love Field there was Air Force two and Air Force One Air Force two was Johnson's

Force One Air Force two was Johnson's plane there are mirror images of each other duplicates there was absolutely no reason why Johnson could not have gotten in the Air Force two and gotten up in the air instead he makes Air Force One his plane I mean he is now the president you see so he's gonna make Air Force one his plane now he later said that the real reason that he'll Allah gagged around was he wanted it to wait for Mrs. Kennedy he was being chivalrous he didn't want to leave her alone there in Dallas you know as if this was some foreign country or something but when Mrs. Kennedy arrives at Dallas Love Field with the casket the the thing is she is obviously filled with despair and shock traumatized she's just lost her husband an hour before her clothes are covered with the president's blood and not surprisingly she heads straight to her bedroom the problem is that Mr. Chivalry Lyndon Johnson has not had any of advisers tell her that he has commandeered her and President Kennedy's plane she thinks this is still there playing and a Johnson's naturally gonna go back on Air Force two she proceeds directly to her bedroom and guess who is sprawled out on her bed yes Mr. Chivalry Lyndon Johnson and here's the clincher when he arrives at Dallas Love Field not only does he commandeer Air Force One but he actually has his aides take the luggage out of Air Force two and transfer it to Air Force One does this look like a man who is concerned about the possibility of a nuclear strike by the Soviet Union so it's clear as we look at this thing and keep in mind that when you're examining circumstantial evidence you'd only leave your common sense out of the equation that when we look at this thing it's clear that Johnson was charged with two responsibilities one was to get that body out of Dallas at all cost and

body out of Dallas at all cost and prevent an autopsy from being conducted by the civilian authorities as required by state law and to get that body into the hands of the US military back in Washington DC Maryland second he was charged with responsibility of conjuring up this this possibility of nuclear war between the United States and the Soviet Union keep that second point in mind because it becomes a central element in what is undoubtedly one of the most brilliantly cunning highly sophisticated plots in the history of assassination one based on the two most important words in the American political lexicon in our time national security you [Music]
